

## Digital Equipment

We have an extensive inventory of the finest digital equipment available today. We have seven medium format digital backs in house: Phase One P45, P30, and the Leaf Aptus 75. Each back will fit on our Hasselblad H1, H2, or Sinar view cameras. We stock both the Phase One Flex Adapter and the Kapture Group sliding adapter. And we have a large inventory of Schneider Digital lenses, including macros.

If you prefer to shoot with a 35mm SLR, we stock both the Canon 1Ds Mark II and the 1Ds Mark III camera bodies. We have a large selection of Canon lenses in stock, including tilt-shift lenses.

Each studio contains a digital workstation outfitted with a Mac Pro computer tower (with Intel processor) two Eizo ColorEdge 21" monitors, an APC battery back-up power supply and connection to our RAID in our digital department. All digital files are stored a minimum of 30 days for your protection.

We always keep a large stock of portable hard drives on hand to transfer your images to at the end of your job. Or we can burn a DVD if you prefer.

But most important is our digital department staff. You'll find our digital team experienced and dedicated to helping your shoot run as smooth as possible. In addition, we work with a core group of highly experienced freelance digital techs on a regular basis. If you have any questions about our digital services, please don't hesitate to call us at 212-228-4068 and we'll be happy to talk with you.
