

Non-Digital Equipment

Here's where you'll find our camera equipment and accessories. Our Sinar equipment can be used with either our Leaf or Phase One digital back and sliding back adapter (Flexadapter or Kapture Group), or can be used with a traditional film holder (4x5 or 8x10).

We have a large selection of traditional large format lenses, however, if you're shooting digital we recommend using one of our Schneider Digitar lenses. Their higher resolution produces noticeably sharper digital files in most cases. We carry the Sinar system of accessories if you need a lens shade, wide angle bellows, extension rail, etc.

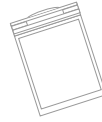

For those preferring to shoot with a medium format camera, our Hasselblad equipment can be used with either a digital back or film back. The same Hasselblad lenses are used in either case. The Hasselblad 120mm macro lens is very popular among still life photographers.

We also have a large inventory Mamiya RZ67 equipment for those shooting medium format film. Our digital backs however, will not fit on our Mamiya RZ67 camera bodies. The RZ67 system is an excellent medium format camera system for film, however in digital applications the larger 6x7 format and Mamiya's corresponding lenses proves to be a liability and the 6x4.5 format of the Hasselblad is usually a superior choice.

SINAR LARGE FORMAT CAMERAS
